GHOSTROOM

DECENTRALIZED WEB3 MESSAGING & PAYMENTS ON SOLANA

PROBLEMS YOU FACE

- Centralisedmessagingplatforms faceincreasing regulatory,privacy and censorship risks (forexample, even majorservices'leadership being scrutinised or charged for allowing criminal activity).

- Many messaging systems are not native to Web3: they don't integrate seamless crypto payments or token-based rewards, and user data/control remains in centralized hands.

- Micropayments, tipping, creator monetisation and integrated chat-payments remain fragmented or require leaving the chat interface.

- Users who want privacy + crypto payments + messaging in one package have few good options.

SOLUTION: GHOSTROOM

GhostRoom addresses these problems by offering:

Decentralised Messaging on Solana

UtilisingSolana for high through put, low cost transactions ensures messages,calls and payments happen rapidly and cheaply. According to GhostRoom: "Solana is the ideal foundation … due to its industry-leading transaction speed (up to 65,000 TPS), extremely low fees

In-Chat Crypto Payments & Tipping

GhostRoom integrates payments directlyinside conversations: users can send messages, make calls and transfer value—without leaving the chat interface.

Fair Token Launch and Community Ownership

The native token $GROOM will be launched via a 100% fair-launch model: no presales, no private allocations, fully open to community participation.

Privacy & Security Focus

GhostRoom emphasisesusercontrol of data and assets, leveraging security-centric engineering ("team has over 20 years of combined experience in programming and network security.

Interoperability & Web3 Integration

The platform plans to integrate with DeFi, NFT marketplaces and other Web3 apps—creating a broader ecosystem around messaging, payments and community.

TOKEN & TOKENOMICS

TOKEN: $GROOM

- Token Purpose: governance, staking rewards, community incentives, in-app payments.
- Launch Model: 100% fair launch via pump.fun (no presale, no private allocation) - every participant gets equal opportunity.
- Supply & Allocation: Total supply 10,000,000 (as listed)

- Tax & Liquidity: 0/0 tax. Liquidity locked.CA Safedesignation. gregarious-faun-568087.netlify.app
- Alignment: Designedto align long-term community growth, not just short-term speculation.

ECOSYSTEM & FEATURES ROADMAP

GhostRoom's roadmap is divided into four phases:

Phase 1

- Website design & development.
- Whitepaper creation.
- Setup of the core messaging framework.
- Early community formation and engagement.
- Official launch on pump.fun.

Phase 2

- Roll-out of text and image messaging within GhostRoom.
- Strategic marketing campaigns targeting Solana / crypto-native communities.
- Integration of x402 (Coinbase's internet-native payment protocol) for in-app payments and tipping.

Phase 3

- Large-scale marketing to Web3 audiences.
- Launch of audio & video calling.
- Integration with the broader Solana ecosystem for interoperability.
- Implementation of GhostRoom Pay (crypto payment gateway) powered by x402.
- New UI design, GhostRoom v2 with modular architecture.

Phase 4

- **Launch GhostRoom app on Solana Mobile DApp Store. Global marketing expansion — GhostRoom Ads, influencer collaborations. Listing on major centralized exchanges (CEX) for global exposure.**
- **Launch of group chat / community channels.**
- **Introduction of streaming feature for real-time content & creator interaction.**
- **Launch staking & rewards for active users and token holders.**

LEGAL & COMPLIANCE

Compliance: Use of x402 payment rails may involve regulatory considerations depending on jurisdiction; GhostRoom encourages users to conduct their own research and consult advisors.

Liquidity locked; transparency commitments in token launch.

Jurisdiction: Users should verify legal and tax implications in their country.

CONCLUSION

GhostRoomoffersaunifiedplatformwheremessaging, payments and Web3 communities converge. Builton Solana'shigh-performancechainandleveraging the x402 payment protocol, it provides a private, fast,low-fee,anddecentralisedalternativeto classic messaging apps. With a fair launch token model andcommunity-drivenroadmap,GhostRoom is poised to empower creators, communities and crypto-native users alike.
